

Accelerating Data Center Construction

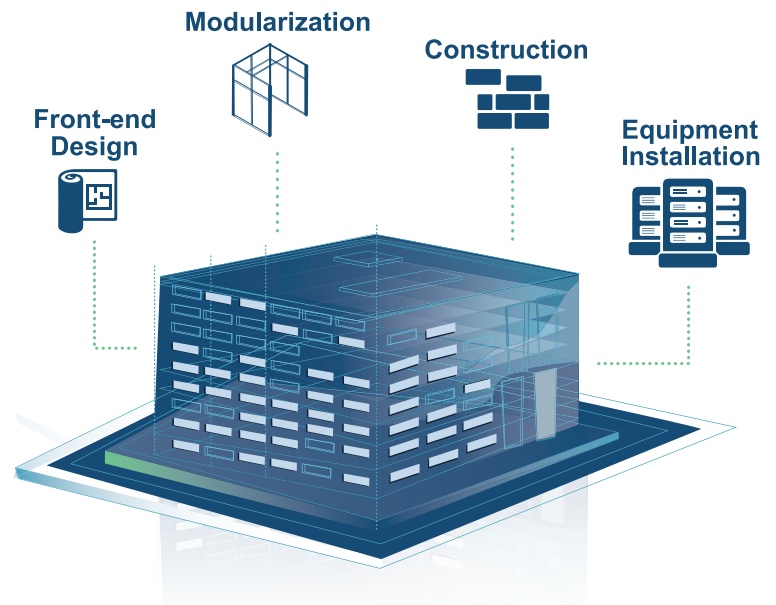

In a world driven by data, the need for fast, reliable, and scalable data centers has never been greater. As a leading national construction company, Day & Zimmermann (D&Z) brings more than 40 years of mission-critical facility experience to help you build data centers smarter, faster, and safer.

THE BENEFITS OF PARTNERING WITH D&Z

Proven Mission-Critical Expertise

We help maintain more than half of the nuclear reactors in the U.S., a responsibility that shows how much our utility customers trust us to keep their operations running smoothly. D&Z's experience in managing critical systems means we understand how to deliver projects on time and within budget, delivering complex, high-stakes work where precision matters.

- 40+ Years of success in high-stakes industries like nuclear power construction and maintenance
- Teams supporting 50%+ of the U.S. nuclear fleet's critical needs
- National operations delivering complex projects across the U.S. and Canada

Accelerated Project Execution

Time is critical in data center construction. Our proven fast-track construction methodologies, multiple fabrication facilities, and nationwide labor force means we can rapidly mobilize specialized teams across multiple sites and scale resources based on your project's needs.

- Nationwide fabrication facilities reduce on-site construction time while improving quality and safety
- Scalable labor resources for rapid mobilization, no matter the project scope
- Modular construction methodologies for fast-track execution without compromising quality or safety

Leader in Mechanical, Electrical & Piping Craft

Our nuclear and advanced manufacturing experience directly translates to data center construction for you and your clients.

We install large volumes of varying sizes, alloys, and installation codes of precision piping every year for industrial and energy clients with industry-leading quality and safety. D&Z combines our piping expertise with advanced electrical infrastructure expertise and mechanical craft for critical systems like UPS, PDUs, water circulation, fire suppression, HVAC, and cooling systems.

In 2024, D&Z had over 20 million craft hours worked.

Your Needs, Our Commitment

SAFETY FIRST, ALWAYS

At D&Z, our first and most fundamental core company value is safety—to maintain a safe workplace and rigor to safety that protects our employees from injury or illness. We use industry best practices, cutting-edge safety technologies, and rigorous training to keep our teams safe, even in environments where uptime and reliability are non-negotiable.

QUALITY YOU CAN COUNT ON

Our Quality Management System (QMS) delivers consistent results that meet the highest standards set by organizations such as the American Society of Mechanical Engineers (ASME), National Board Inspection Code (NBIC), and the International Organization for Standardization (ISO). From start to finish, our teams focus on exceeding quality expectations.

QUICK RESPONSE TO LABOR NEEDS

With deep, long-standing relationships across union and open shop labor markets, we provide quick access to qualified, skilled craft resources. These relationships are the result of the work we do across the country to build, maintain, and support our most valuable asset: our people.

Ready to Accelerate Your Data Center Construction?

When speed to market matters, D&Z is your go-to partner. Whether constructing new facilities, modifying existing data centers to increase capacity, or scaling modular solutions, we combine the precision of mission-critical expertise with the agility needed to meet aggressive timelines.

Let's discuss how D&Z can help turn your next data center project into a success—on time, on budget, and with unmatched safety and first-time quality.
